

An interactive interface to an array-centric ecosystem

Interactive layer - IPython / Jupyter

Language runtime

CPython - C / C++ / Fortran / Cython extensions

Array core

NumPy (n-dimensional arrays, ufuncs, broadcasting)

Core scientific libraries

SciPy - pandas - Matplotlib - SymPy

Domain & analysis libraries

scikit-learn - xarray - statsmodels - scikit-image - NetworkX

Scale-out & acceleration

Dask - array protocols / GPU back ends
